2. The construction of a second track on the Berlin-Grunau-Karlshorst railroad line has been under way since late May 1951. Officially it is stated that this project is connected with the International Youth Games. However, the real purpose of this construction work is to reroute trains, formerly arriving at 'nhalter Bahnhof in the U.S. sector of the city, to Soviet sector railroad stations. **

* Comment. The Mosel-Ostmannsdorf line, which is 13.8 km long and runs north of Zwickau, is only of local importance. In the Soviet Zone summer railroad guide, which went into effect on 20 May 1951, this line is listed as being still operational under No 163e. The Gosdorf-Kohlmuehle-Rohnstein railroad line is 12.1 km long and runs east of Pirna. It has only local importance. In the Soviet Zone summer railroad guide it is listed as being operational under No 165 f.

** Comment. This project is connected with the double-tracking of the southern section of the Berlin Outer Freight Ring. The line section mentioned is a continuation of the Outer Freight Ring to the east of Berlin. See
